BTR Project Purpose

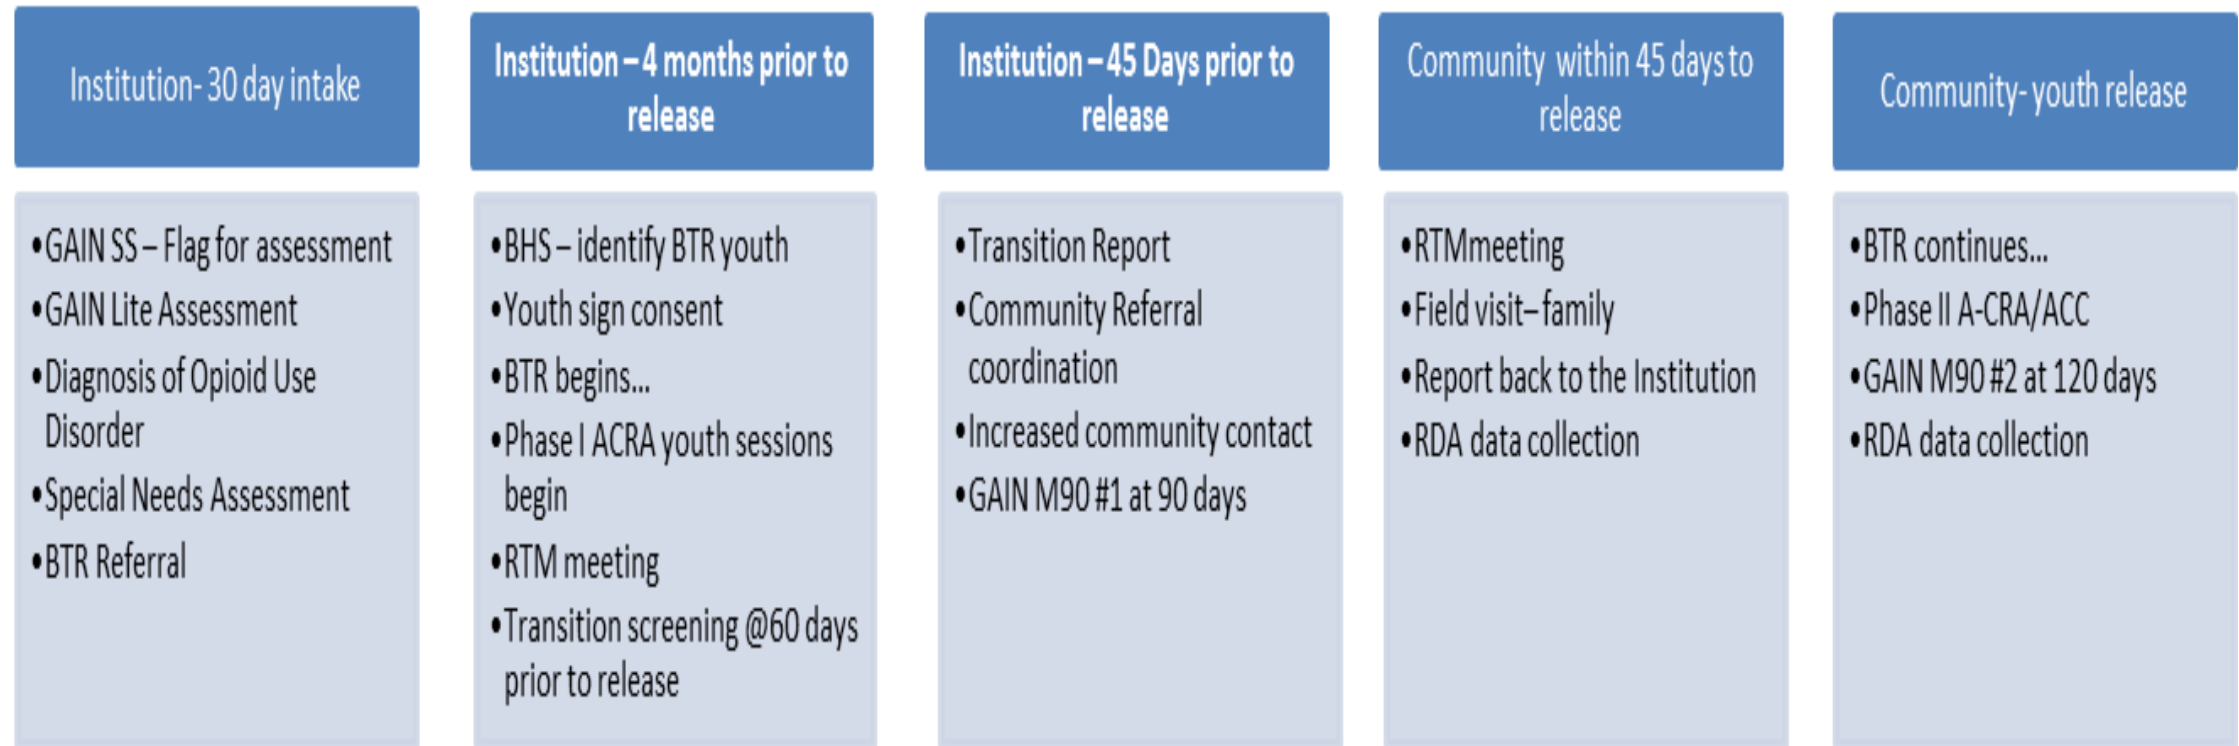

Program Eligibility:

- OUD Diagnosis
 - Mental Health diagnosis
 - Age 12-24 years old
 - Parole and No-Parole
- Track I: ACRA Phase 1 only (no-parole) services inside Facility only. Pre-release youth referred to outside treatment or support resources.
 - Track II: ACRA/ACC Phase 2 (parole) receive services inside facility and up to 90 days while on parole.

BTR Services include:

1. Screening. Utilizing a validated screening tool (GAIN SS)
2. Initial Assessment. After the GAIN SS indicates further assessment (positive score of 2 or more). Again, utilizing a validated assessment tool (GAIN-I/Lite). GAIN M90 follow-up provided at 90 days in Phase I and 120 days in Phase II
3. Service Coordination. Driven by the assessment results, we develop a comprehensive service plan (substance abuse services, educational and Medication Assisted Treatment).
4. Service Initiation. Phase I ACRA services begins within 4 months prior to release. Phase II ACRA-ACC transitional services begin within 48 hours of release. Referrals to Medication Assisted Treatment (MAT) as deemed appropriate.

BTR Service Flow Chart

MEDICATION-ASSISTED TREATMENT (MAT)

OUD Treatment Methodologies
